not built that way. But when we own such a good proposition as the famous Meister piano we're willing to back it up to the limit of our capital.

The Meister has got to make good in your own home before you decide to buy it. Away from the influences of salesmen, away from all argument, away from our store—the Meister has got to stand on its own bottom and win you over. Without its beautiful rich tone, it would be a flat failure. Without its perfect workmanship, inside and outside, it would make a mighty poor showing in your home. Then you'd send it back: so would the thousands of others who take the Meister on trial every year. The Meister has got to be so good that you won't send it back. If we didn't know it was that good we'd never spend money advertising a thirty day free trial.

We make eight different styles of piano, but the biggest seiler is the one we offer at \$175. You mustn't let the low price prejudice you against it. You mustn't judge Meister prices by any prices you've seen elsewhere. We make the Meister ourselves, sell it direct to you and give you a recolutionary value.
